

**IMED CAMPUS WATERMAIN IMPROVEMENTS
NAPERVILLE, ILLINOIS**

Dynacom Management constructed a four story office and medical building along 75th Street. As a part of this project, approximately 1,500 lineal feet of 8" water main was designed and constructed to connect two water mains owned by the City so adequate water volume and pressure could be provided to the office complex for domestic and fire suppression needs. Coordination with the adjacent property owner was a key component of the project as one of the watermains was on their project and easements and restoration were required.

Services Provided:

- Final Engineering
- Coordination with City of Naperville, DuPage County Division of Transportation, DuPage County Division of Environmental Concerns, Illinois Environmental Protection Agency, Illinois Department of Natural Resources, Illinois Historic Preservation Agency
- Stormwater Management Analysis

This project reflects Firm
and Staff experience.
