

## THE GARDENS OF NORWOOD PARK, CHICAGO, ILLINOIS

Engineering and Surveying Services were provided for the development of two three story residential buildings each with nine condominiums on an approximately 1.0 acre site. A 30 space on-site parking lot. Site improvements included sanitary sewer and water service connections within Northwest Highway, on-site storm sewers and underground detention facility, detailed site grading, and soil erosion and sedimentation control measures. Coordination with the City of Chicago Department of Water Management and Department of Transportation, the Illinois Environmental Protection Agency, Illinois Department of Transportation and other agencies for the necessary permits was also included.

### Services Provided:

- Prepared Preliminary and Final Site Engineering Plans and the appropriate construction documents
- Provided drainage and stormwater management calculations and design including preparation of required permit applications
- Provided coordination and preparation of permit applications for IHPA, IDNR, IEPA, IDOT, MWRD and the City of Chicago's Department of Water Management and Department of Transportation

This project reflects Firm  
and Staff experience.
