

## OIL CAN HENRY'S, NATIONAL

Provided civil engineering, geotechnical, structural and environmental engineering, including land (re)development risk management consulting to Oil Can Henry's (OCH) landowners and franchisees throughout the nation. ESI worked closely with OCH and the project architect.

Projects included site topographic/boundary surveying, erosion and sediment control planning, grading and storm drainage planning, water and sanitary sewer planning, SEPA, Phase I, environmental investigation/cleanup (soil, surface/groundwater, asbestos, lead based paint, geotechnical investigations, and structural engineering).

This project reflects Firm  
and Staff experience.

*Excellence, Service, Integrity*
